Junior Full-Stack Developer | TypeScript, React, Node.js, Python & Java

Education

Universidad Nacional del Sur — Bahía Blanca, Argentina
Information Systems Engineering - In progress — Expected graduation: 2027

Professional Experience

Universidad Nacional del Sur — Bahía Blanca, Argentina
Teaching Assistant — Introduction to Object-Oriented Programming — October 2026 – Present

- I help first-year students during the practical object-oriented programming classes in Java, answer their questions and grade their work. I got the position through a competitive selection process.

Independent web development — Remote
Freelance Web Developer — July 2026 – Present

- I built an online store that takes real payments on Cloudflare Workers, Supabase (PostgreSQL) and Mercado Pago, with prices and stock calculated on the server and tests with Vitest, pgTAP and Playwright in CI.
- I built a catalog with a React admin panel and a PHP 8 API with MariaDB, live on shared hosting since September 2026.

Propio Language Services — Remote
English–Spanish Medical Interpreter — October 2025 – Present

- I provide consecutive interpretation by phone and video, 20 hours a week, for emergencies, consultations and preoperative preparation.

Interpretia — Remote
Medical, Financial & Emergency Interpreter — November 2023 – October 2025

- I interpreted medical, financial and 911 emergency calls, with monthly quality scores of 95/100 or higher throughout.

Selected Projects

Palma Turismo — Booking Platform for a Travel Agency — Academic project with a real client · 2026
React · Node.js · Express · PostgreSQL · Prisma · JWT · Mercado Pago · PostHog · Docker · Cloudflare Workers · Render | *palma-turismo.palmaturismo.workers.dev*

- Over four months, my team built the booking platform for a travel agency in Coronel Suárez, iterating on the changes the client asked for at each delivery.
- I developed full-stack features for bookings, the admin dashboard, in-person sales, payments, passenger management and a rewards system.
- I integrated Mercado Pago, role-based JWT authentication, transactional emails and PostHog analytics, with persistence in PostgreSQL through Prisma ORM.

HAL 2026 — RAG Agent for Physics I — Independent project · 2026
Python · FastAPI · ChromaDB · Sentence Transformers · Groq API · Llama models · Next.js · React · TypeScript | *hal2026.dev.ar* · *Repository*

- I built a full-stack RAG application that answers questions and solves exercises from academic sources, with 34 documents indexed into 2,414 chunks using embeddings and ChromaDB.
- I implemented a FastAPI backend and a conversational interface with memory, LaTeX formulas and free-body diagrams.

Education & Sports Club Management System — Functional Analysis & Web Development — Academic project · 2025
Next.js · TypeScript · Node.js · PostgreSQL · Neon · Vercel · ProjectLibre · Excalidraw

- With my team, I documented a sports club system for another team to implement, using requirements, user stories, acceptance criteria and wireframes.
- I implemented the student, grades and academic history views and grade entry in Next.js, over three sprints with functional and regression testing.

Skills & Languages

Core stack: TypeScript, JavaScript, Python, React, Next.js, Node.js, Express, FastAPI, HTML, CSS, Tailwind CSS, SQL, PostgreSQL and Prisma ORM.
Java & design: Java, object-oriented programming, Strategy and State patterns, UML.
AI & data: RAG, Sentence Transformers, embeddings, ChromaDB, Groq API and Llama models.
Testing: Functional, integration and regression testing; Vitest, pgTAP and Playwright; academic practice with Selenium and Cucumber.
Platforms & deployment: Git, GitHub Actions, Docker, Nginx, Cloudflare Workers, Supabase, Render, Vercel, PHP and MariaDB.
Languages: Native Spanish; advanced professional English, C1 (EF SET, 2026); Cambridge English B2 First (FCE).
